

## **Air Cooled Modified Home Build Class**

This class is primarily intended for those pupils who have carried out the modifications **themselves**.

- Pre Modified purchased engines are not allowed.

Modification to bikes in this class may be to:-

- The Engine
- The Carburation
- The Exhaust System
- The Chassis or Brakes

Entrants to this class must compile a folder showing work carried out by themselves. They must also fill in the entry forms located on this website and presented with the folder at the start of the meeting for the judges.

What I will need in my folder.

- A statement explaining whether the bike is new or refurbished machine from a previous year.
- A folder with a few photographs showing you building or refurbishing the engine.
- Photographs to show any other modifications you have done.
- A paragraph or two to say why you have modified certain parts of the bike. What are you trying to achieve?
- Say how you found the information you needed to carry this work out.

### **NOTE:**

Purchased readily available parts i.e., barrels / piston kits / cranks etc., already modified can be used as long as the engine is modified by you and the parts are fitted by you the pupil.

- You will need to make a list of things you have bought for your engine and add this to your folder.

**PURCHASED READY MODIFIED ENGINES ARE NOT ALLOWED IN THIS CLASS.**
